

SPIROL Update Regarding Middle East Developments

March 5, 2026

Our thoughts are with those affected by the current developments in the Middle East. SPIROL is closely monitoring the evolving security situation in the Middle East and its potential impact on global logistics. *SPIROL operations and shipments remain unaffected.*

SPIROL manufacturing locations do not route shipments through the Middle East when supplying our global distribution facilities. As a result, our manufacturing operations, inbound material supply, and outbound customer deliveries remain unaffected. Products currently in transit continue to move as scheduled, and our global locations maintain inventory to support ongoing customer demand.

SPIROL will continue to monitor global logistics conditions and provide updates should circumstances change that could affect delivery commitments. SPIROL remains committed to reliable supply, transparent communication, and proactive planning to support your operations. We appreciate your continued partnership and the collaboration that helps ensure we achieve our shared objectives.

Sincerely,

David LaFleur
President
